

Madrid, December 11th 2019 – 5th CONSORTIUM of MEMBERS

# Road Map for 2020

Paul LUU, Executive Secretary

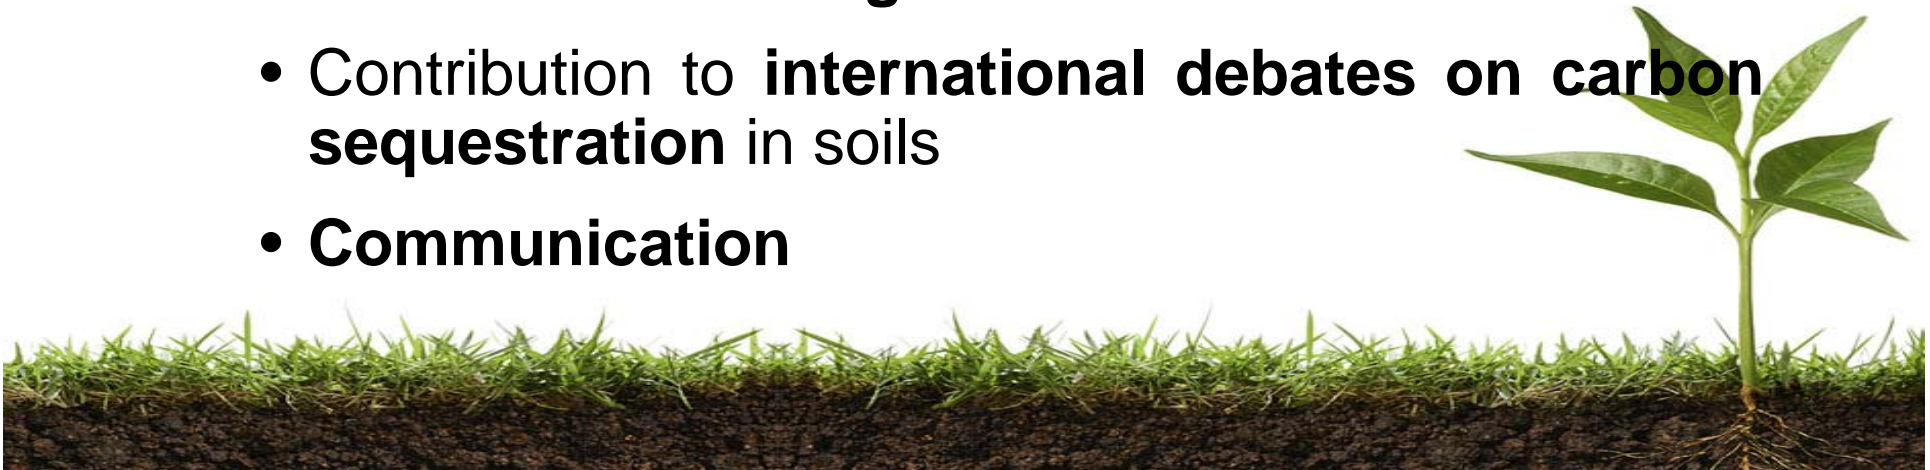

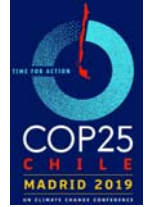

# Orientations & activities

In line with the actions carried out in 2019, it is proposed the following activities during the year 2020:

*RM 1*

- Continuation of the **work of the STC**
- Continued work on the **collaborative platform and its operation**
- Specific **work to be done with public and private funders**
- Establishment of **regional level** within the Initiative
- Contribution to **international debates on carbon sequestration** in soils
- **Communication**

# Continuation of STC work (1)

## Research orientations and scientific cooperation:

RM 2

- Continue the **precise inventory of research actions currently conducted** on carbon sequestration in soils
- Have a **global vision of "who does what and where"**, to establish a thematic and geographical mapping of these partnerships
- Increase collaborative work with partners (inc. CIRCASA) on the **mapping of "hotspots"** where soil carbon sequestration potential is highest or soil carbon loss is most urgent to be tackled

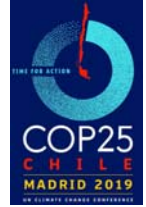

# Continuation of STC work (2)

## Projects evaluation:

RM 3

- Following the STC work and the 2019 edition, perenise **an international call for projects**, incl. from partners, to be assessed with the help of the STC and the ES
- **Specifications** for development of **an existing tool** to facilitate self-assessment by project holders
- Continue to work with voluntary carbon markets to **mainstream the inclusion of soil carbon in existing project evaluation and certification schemes**

# Continuation of STC work (3)

## Other works:

RM 4

- Contribute to the elaboration by the Bureau of **medium terms vision** (5 - 10 years), and a plan of action
- Continuation of the production of **synthesis documents on the scientific aspects** of the "4 per 1000" Initiative
- Continuation of the **active contribution** to the elaboration of **documents concerning implementation or elaboration of good practices**
- **Drafting of the book** on the "4 per 1000" Initiative
- Actively engage discussions regarding **harmonization and standardization of measuring, MRV soil carbon**, through collaboration with the GLOSOLAN of GSP and the national standards bodies of ISO

Madrid, December 11th 2019 – 5th CONSORTIUM of MEMBERS

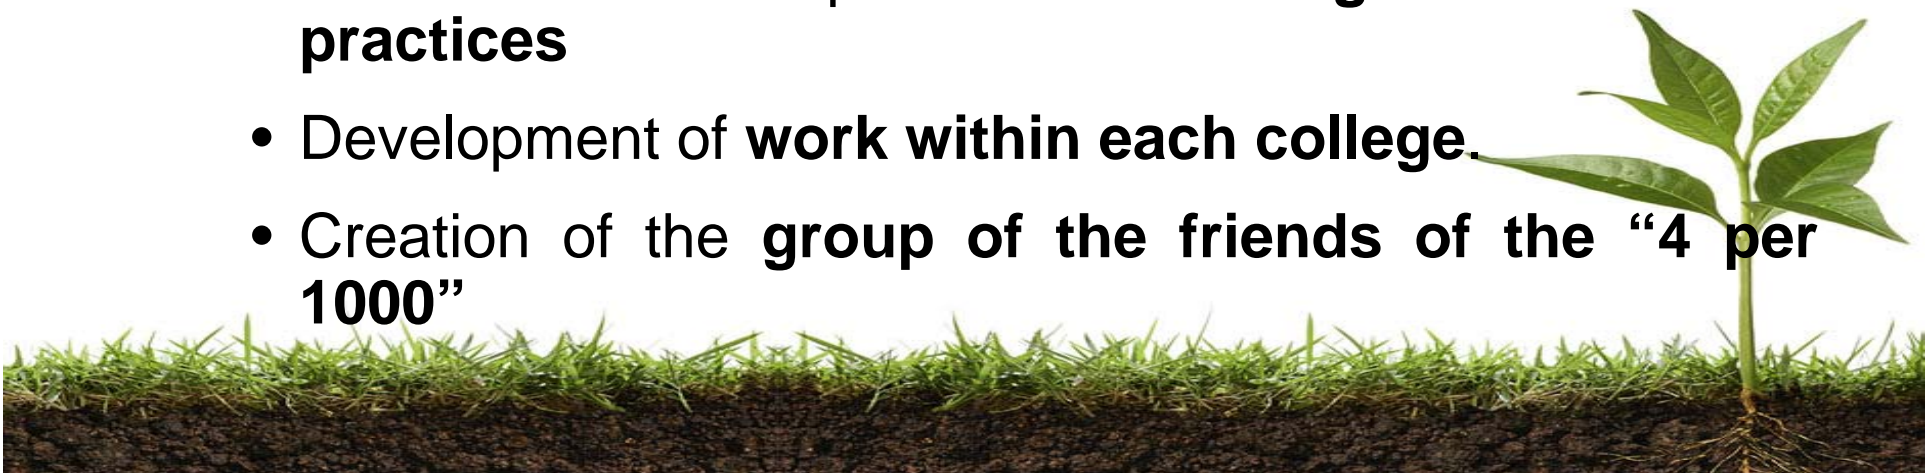

# Collaborative platform

**Officially opened** on 12th September, 2018, the platform has to be animated by partners helped by ES.

RM 5

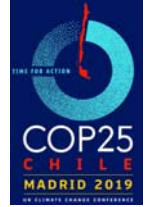

The platform will be **extended** and **improved** through a change of technical support:

- **Identification of all partners** in the Initiative, and their activities within the scope of the Initiative
- **Maps with geographic location** of members and partners
- Establishment of a place for **collecting information on practices**
- Development of **work within each college.**
- Creation of the **group of the friends of the “4 per 1000”**

Madrid, December 11th 2019 – 5th CONSORTIUM of MEMBERS

# Work with public & private funders

To accelerate funders involvement and the widest possible mobilization of public and private funds to support the actions implemented by the project:

RM 6

- Continuation of the **donor awareness** and **fundraising campaign** initiated in 2018 and building a **network of partnerships**
- Seeking **funding for the Executive Secretariat** of the Initiative in particular **support by international foundations** will be sought.
- Upon decision of the Consortium, **creation of a “4 per 1000” foundation**
- Work on taking into account the **Green finance** and the **Carbon Markets Initiative**

Madrid, December 11th 2019 – 5th CONSORTIUM of MEMBERS

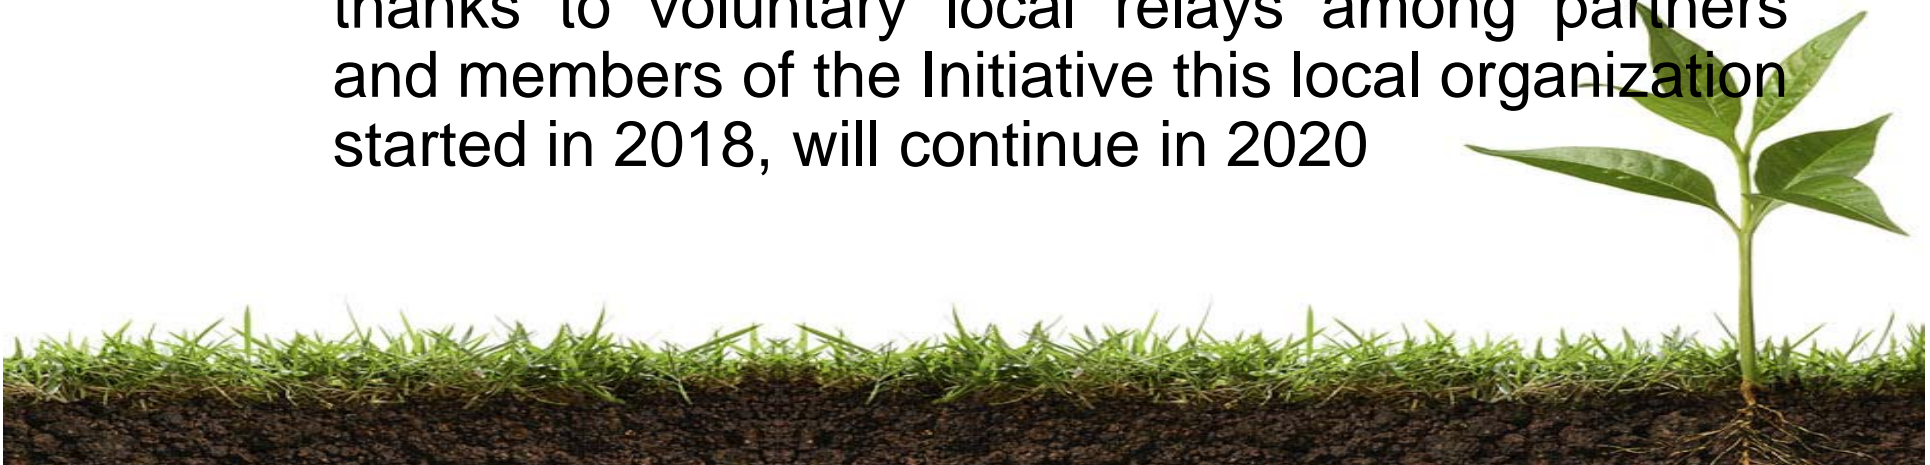

# Establishment of a regional level

RM 7

The partners and members have a particular interest in the region in which they are located. By working with the local relays they constitute, regionally specific possible actions can be identified.

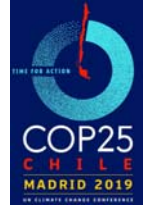

- **Promotion of the Initiative**, each partner and member can promote the Initiative and build membership around it
- **Organization of meetings at regional levels**, thanks to voluntary local relays among partners and members of the Initiative this local organization started in 2018, will continue in 2020

Madrid, December 11th 2019 – 5th CONSORTIUM of MEMBERS

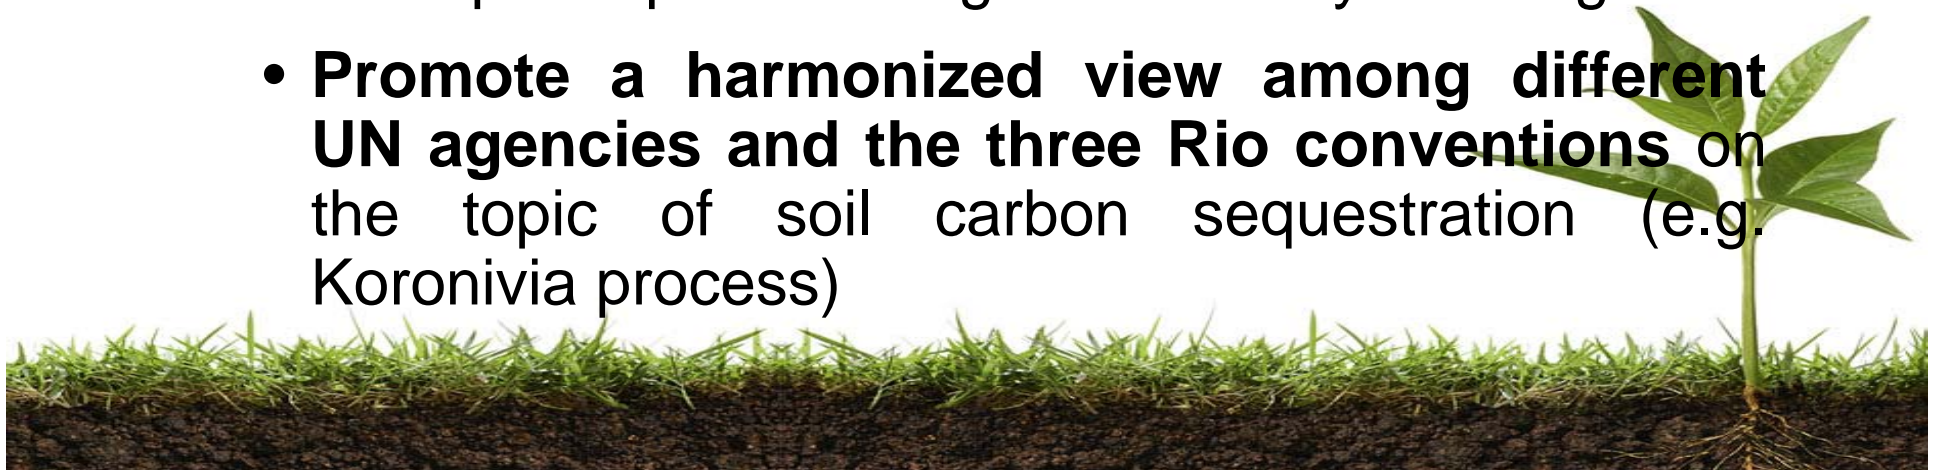

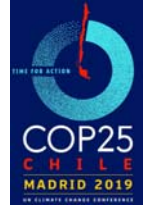

# Contribution to international debates on CSS

Other initiatives include promotion of CSS. To avoid duplication and create synergies with cross-exchanges

RM 8

- **Participation** in meetings, symposia and other conferences
- **Open the meetings of the Initiative Forum to other actors** and discuss that matter
- **Address the issue of exchanges and synergies** to be put in place during the statutory meetings
- **Promote a harmonized view among different UN agencies and the three Rio conventions** on the topic of soil carbon sequestration (e.g. Koronivia process)

# Communication

In line with the action launched or continued in 2018:

RM 9

- Development and animation of the **regional correspondents' group**
- **Website of the "4 per 1000" Initiative** permanent maintenance
- Continuation of the publication of the **newsletter** in French, English and Spanish
- Regular **contacts with medias** and journalists
- Continue the presence of **the Initiative on social networks**
